

INTERVET UK LTD Environmental Policy Statement

Intervet UK Ltd is part of a global business which develops, manufactures and supplies products to protect and enhance the health of animals. We are committed to ensuring that we minimise any adverse environmental impact of our products and activities and our aim is to prevent pollution and to continuously improve our environmental performance.

As a company we will:

- Research and manufacture our products in accordance with all applicable legislation and product licensing requirements
- Provide sufficient information for the safe use and disposal of our products

For the environmental impacts that we can control or influence, our objective is to:

- Reduce waste
- Conserve energy and natural resources
- Safely store and transport hazardous substances
- Control discharges to water and emissions to air
- Prevent pollution from oil/fuel stores
- Maintain natural habitats and our heritage

We will encourage the active involvement of all employees and our contractors to achieve our objectives.

We will provide such information as necessary to:

- our employees and contractors so that they can work in an environmentally conscientious way
- all stakeholders so that they understand the importance that Intervet UK Ltd places on managing the environment in both the local and wider environments in which we operate

Our environmental management systems will be consistent with the international standard ISO 14001 and will be subject to review by both the senior management of the company and external verification.

To ensure that we are successful in managing our environmental obligations, it is important that we engage the commitment of all levels from within the company and that we review our performance so that we can identify and make further improvements.
